ABOUT ME

I am a front-end-focused web developer passionate about creating clean, responsive, and user-centric digital experiences. With expertise in HTML, CSS, JavaScript, and modern frameworks, I specialize in crafting intuitive interfaces that combine aesthetic appeal with functional precision. My work emphasizes accessibility, performance, and design consistency across all devices.

While my core strength lies in front-end development, I also bring experience in full-stack workflows and am currently exploring deep learning through hands-on projects. This blend of skills allows me to integrate innovative, data-driven features into visually compelling and highly usable web solutions.

EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY

2023-2026

Bachelor of Computer Application

Specialized in AI & ML

CGPA 8.96 / 10

SKILL

- HTML5 & CSS
- JavaScript
- JQuery
- PHP & MySQL
- Bootstrap
- Python

WORK EXPERIENCE

Joy Innovations Private Limited – Full-Stack Developer Intern

2025 MAY – 2025 JUN

- Designed and developed responsive, user-friendly front-end websites as independent projects, leveraging modern frameworks and testing across multiple devices-ensuring 100% mobile compatibility and a smoother user experience.
- Gained hands-on experience in core full-stack development, specializing in PHP-based backend systems, by contributing to project workflows and implementing efficient server-side logic-improving backend processing speed by up to 20%.
- Applied expertise in HTML, CSS, JavaScript, PHP, and MySQL to build functional, visually appealing solutions-reducing page load times by 30% and enhancing overall site performance and usability.

PROJECTS

Heart's Café

[LINK](#)

- Developed a fully responsive café website using HTML, CSS, and media queries, implementing clean semantic markup, cohesive layouts, and best practices in responsive design to ensure accessibility, intuitive navigation, and consistent performance across all devices.

Portfolio Website

[LINK](#)

- Built a high-impact, fully responsive portfolio website using HTML, CSS, Bootstrap, JavaScript, and media queries, showcasing projects with intuitive navigation, engaging interactivity, and seamless performance across all devices-strengthening professional branding and online presence.
